MEMORANDUM FOR: Chief, Plans Staff, DD/S

SUBJECT : Possible Locations for Future Records Storage

1. I have reviewed the list of possible locations for records furnished to you in Mr. Meloon's memorandum of 24 July 1969. I don't find it very helpful in this form except as an identification of several places which should be examined.

2. I suggest that representatives of the Offices of Logistics, Security, Training and the Support Services Staff visit the buildings identified in paragraph 3a, b, and e. OL, OS, and SSS should probably look at 3h, too. 3g might be visited if that site is likely to continue as a permanent Agency asset but if it is likely to be given up, or its status is in doubt, the trip might not be worthwhile. 3c, d, and f sound totally impractical and probably aren't worth serious consideration although they might be visited by the group conducting the evaluation.

3. Perhaps a memorandum from the DD/S to the Directors of Logistics, Security and Training and the Chief, Support Services Staff requesting an evaluation of these buildings would be the best way to get the job accomplished.
